

EuroChem is a leading global agrochemical company producing primarily nitrogen and phosphate fertilizers, as well as certain organic synthesis products and iron ore. The Group is vertically integrated with activities spanning from mining and hydrocarbons extraction to fertilizer production, logistics, and distribution.

EuroChem is currently developing two sizeable potash deposits in Russia with its VolgaKaliy and Usolskiy Potash greenfield projects. Headquartered in Zug, Switzerland, the Group operates production facilities in Belgium, China, Kazakhstan, Lithuania, and Russia, supporting distribution assets in Europe, the CIS, Asia, and North and South America. EuroChem employs more than 25,000 people globally.

We are looking for a committed colleague for our team in Mannheim, Germany
starting as early as possible as

QUALITY MANAGER

Job description:

As Quality Manager, you are responsible for steering quality requirements and setting the related processes and procedures.

Your tasks in detail:

- Maintain and further improve company's Quality Management System
- Manage diverse quality certifications like GMP+ and ISO
- Steer the Product Stewardship System
- Analyze quality performance and develop processes and procedures to ensure adherence to quality standards
- Set up and maintain controls and related documentation
- Cooperate with colleagues, service providers and customers world-wide
- Advice and train internally and externally on product related specifications and handling requirements
- Conduct inspections and audits at production plants and warehouses with regard to quality, safety and security

Necessary qualification:

- Successfully graduated in natural sciences or in business administration
- 3+ years professional experience with focus on quality and/or process management
- Audit experience
- Very good knowledge of MS Office package; experience in database modules is a plus
- Excellent English language skills
- Excellent communication, good networking skills and intercultural understanding
- Strong analytical and problem-solving skills, process-oriented thinking
- Customer centricity and innovative thinking
- Readiness to travel for business

Company benefits:

- Working in a committed team with an international working environment and an open working atmosphere
- Position appropriate remuneration and further benefits
- Attractive social benefits as well as various company pension scheme possibilities
- Workplace health management and the acceptance of social responsibility (CSR-Team)

If you are interested and want to apply for this position, kindly apply [here](#) with your detailed CV.
